PROFESSIONAL SUMMARY

Full-Stack Developer with over 2 years of experience designing and building scalable web applications with Python, Node.js, Angular, React and AWS. Experienced in API development, serverless architectures, deployment automation through CI/CD, and AI-based solutions for enterprise and financial environments. I have built RAG platforms, conversational AI agents and cloud service integrations, with a focus on software quality, operational efficiency and business value.

EXPERIENCE

Full-Stack Developer | Lintryxs (via Oberstaff) 2025 – Present

Remote

- Sole developer of an AI-powered web platform for financial cooperatives and businesses, owning design, backend, frontend, deployment, maintenance and observability.
- Built and exposed REST APIs integrating internal systems, third-party platforms and enterprise services, with a focus on security and performance.
- Developed a RAG (Retrieval-Augmented Generation) platform enabling intelligent queries over corporate knowledge bases using generative AI models.
- Turned a static menu-based chatbot into an AI conversational agent that understands natural language and escalates complex queries to human advisors.
- Deployed and operate the platforms on AWS (ECS, Lambda, API Gateway, S3, EC2, Bedrock, CloudWatch, IAM, VPC) through CI/CD pipelines with GitHub Actions.

Full-Stack Developer (Freelance) 2024 – 2025

Remote

- Built and shipped full-stack web applications with Python, React, Angular, Express and MongoDB.
- Integrated third-party APIs (Google Maps, payment gateways) for seamless communication between systems.
- Used Docker for containerized deployments and set up CI/CD pipelines with GitHub Actions.
- Prioritized code reuse, clean architecture and agile collaboration with clients.

EDUCATION

B.Eng. in Mechatronics Engineering October 2021
University of Pamplona

CS50's Web Programming with Python and JavaScript December 2024
HarvardX

General English & Cambridge C1 Advanced Preparation March 2024
Universal English College

SKILLS

Languages: Python, TypeScript, JavaScript, SQL
Frontend: Angular, React, Next.js, Vue, HTML, CSS, Tailwind CSS
Backend: Node.js, FastAPI, Express
Databases: PostgreSQL, MongoDB, DynamoDB
Cloud & DevOps: AWS (ECS, Lambda, API Gateway, S3, EC2, Bedrock, CloudWatch, IAM, VPC), Docker, GitHub Actions
Artificial Intelligence: RAG, conversational agents, LLM APIs
Tools: Git, Lovable

LANGUAGES
